

Reward Cycle is the first token created by a doxed developer for our RC Elite holders. The original holders of a previous token increased it by 50x. The Reward Cycle token is primarily intended for all of our members and the RC Elite of the future. Reward Cycle offers rewards where you simply hold and receive one or two utility tokens such as USDT, ADA, XRP, ETH, and others. The first token of our Reward Cycle will offer 7% USDT rewards to all holders. Reward Cycle is a reward token and will work on a Launchpad with an audit service.

Reward Cycle is a Defi protocol on Bscscan network, with automatic rewards and tier systems based on a manual buy-back and burn function.

**Contract address:** <https://bscscan.com/token/0x229a54fb9de889c271380452c0483ce89b8c1e0d>

### Services

1. Presale setup fees
2. KYC checking fees
3. Contract Checked vetted by qualified developers
4. Ads on our Launchpad
5. Live AMA in our official RC Telegram group

25% of tokens in the next 7 days from presale and the remaining 25% the following week. As a result, users will receive all of the tokens in two weeks as BCS tokens.

What is so special about RC LAUNCHPAD?

The RC Launchpad is a platform to give prospective users access to a launchpad specifically designed to help creators of new projects to distribute their tokens easily with or without vesting period while simultaneously raising capital for them.

The Launchpad will be operative on the Binance Smart Chain and will be used to launch new IDO coins through PancakeSwap, a decentralized liquidity exchange.

### KYC and Other Important Measurements

To give more credibility to new tokens launched on the Launchpad, the team has put the necessary machinery in place to vet and check tokens and accept only those from qualified developers.

That is beside the "Know Your Customer" (KYC) checks that will be performed on those tokens before they are listed for presale on their RC BSC Launchpad.

Reward Cycle's Reward

USDT is the reward for Reward Cycle's first token while deliberations are ongoing on the second rewards token that will be chosen through a voting process. To earn more rewards, crypto lovers will be required to hold more of the token.

According to the token's creator, 7% of each buy and sell will be dedicated to holders as USDT reward while a further 4% goes into liquidity. Another 4% will be diverted into marketing, making a total of 15% for several purposes.

#### **SERVICES WE OFFER ON RC1:**

1. Presale setup fees
2. KYC checking fees
3. Contract Checked vetted by qualified developers
4. Ads on our Launchpad
5. Live AMA in our official RC Telegram group
6. RC2 Platform discount for ads and promoted spots on the website for project owners who are holding RC1 and RC2

#### **The Tier SYSTEM for RC1:**

Tier 1: Size of holding for each degree of participation

First-tier holders will receive a 25% discount on all of our services if they own 3 million tokens.

Tier 2: 2 Million Tokens in the 2nd Tier entitles you to a 20% discount.

Tier 3: To earn a 10% discount on our services, 3rd tier needs half a million dollars.

Half a million RC Tokens is the minimum purchase. There is no maximum purchase limit.

#### **What is RC 2 and Tier system for RC2?**

RC 2 will be part of the Reward cycle ecosystem and we are working on the utility of the RC2 and we will launch RC 2 Token with special rewards and with the tier system

RC2 is directly linked with RC1 for a few reasons.

### **When is RC2 coming out?**

Reward cycle 2 will be out with the Launchpad and only the RC1 Token Holders can take part in the whitelist Presale. For anyone to qualify for early entry in presale you must hold a minimum of 1 million RC1 Tokens.

RC2 Tier system.

The RC2 will feature a tier system, similar to the RC1, and you will be able to use multiple services. Anyone who wants to use our Launchpad must have RC1 tokens to get the discount. And everyone who wishes to utilize our RC2 platform for our services must own both RC1 and RC2 to be eligible for the discounted prices; RC2 will be a utility website similar to coindiscovery and coinhunt.cc.
